## ROTARY BAND SEALING MACHINES

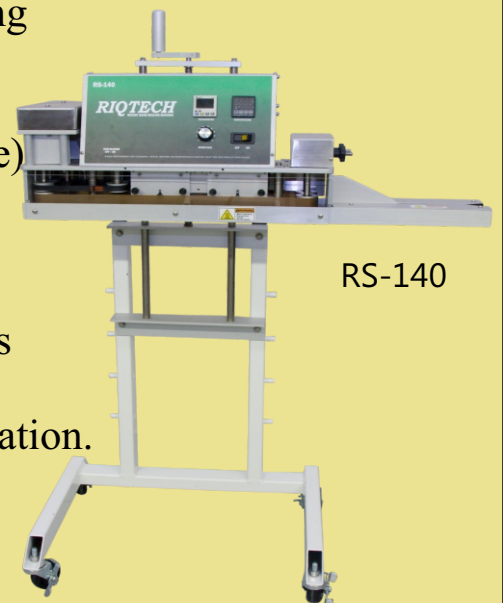

RS-100 table top band sealer with pivot stand is ideal for sealing small bags/pouches. It is constructed with stainless steel and anodized aluminum and build for 24/7 operation.

RS-140 is a continuous rotary band sealer is designed with a 5" heating and 5" cooling zone which makes it effective for sealing difficult materials. Temperature and speed can be easily adjusted to acquire the right seal. Temperature range up to 200°C and variable speed up to 600 inches per minute.

The variable speed sealing head and conveyor with digital speed display makes it easy to synchronize speed. This sealer is available in left to right or right to left feeding direction and comes with a 1/4" standard seal width. (1/8", 3/8" 7/16", and 1/2" seal width are also available). Electrical 110 VAC, 6 amps/60 Hz.(220VAC also available) Trimmer and other custom configurations are available.

RS-140 with conveyor is ideal for sealing bags up to 50 lbs and 30" in height. Sealer constructed with stainless steel, anodized aluminum and HRS steel and build for 24/7 operation. Our unique height adjustable stand with locking casters makes it easy to adapt various bags size applications.
