## MODEL RS-140 INDUSTRIAL GRADE CONTINUOUS BAND SEALER

The RS-140 will seal a wide range of plastic bag materials such as polypropylene, laminates, tyvek, foil and utilizes a 2" rotary blade to trim off the top of each bag. Our unique height adjustable stand with locking casters makes it easy to adapt various bags size.

The sealer is designed with a 5" heating and 5" cooling zone which makes it effective for sealing difficult materials. Easily adjusted are the temperature and speed to acquire just the right seal. The temperature range up to 200°C and variable speed up to 600 inches per minute.

The RS140 delivers seals with the use of heavy duty laminated teflon tape. The variable speed sealing head and conveyor with digital speed display makes it easy to synchronize speed. This sealer is available in left to right or right to left feeding direction and comes with a 1/4" standard seal width (1/8", 3/8" 7/16", and 1/2" seal width are also available).

Standard electrical is set at 110 VAC , 6 amps/ 60 Hz. (220VAC also available). Custom configurations are available upon request.

RS-140 with conveyor is ideal for sealing bags up to 50 lbs and 30" in height. Sealer constructed with stainless steel, anodized aluminum and HRS steel and build for 24/7 operation.
